PawStay: Pet Sitting Network
CASE STUDY 29

By Aryan Yadav | Larry Page

Roll no. 150096725023

Course: html , css , js

1. Problem Statement

What challenges do pet owners face today?

Finding a trustworthy, available pet sitter is time-consuming, opaque, and unpredictable — with no clear visibility into pricing, schedules, or service options.

No Availability Visibility

Pet owners have no real-time way to see when sitters are free, booked, or limited.

Unclear Pricing

Pricing varies by service, pets, and dates — yet there's no transparent breakdown shown upfront.

Booking Friction

Multi-step phone/WhatsApp coordination wastes time and leads to miscommunication.

No Centralized Record

Pet owners have no single place to view, manage, or cancel their upcoming bookings.

2. My Solution

A smart, end-to-end pet sitter booking platform

Real-Time Calendar

Color-coded availability (green/yellow/red) so owners know exactly when a sitter is free.

Smart Pricing Engine

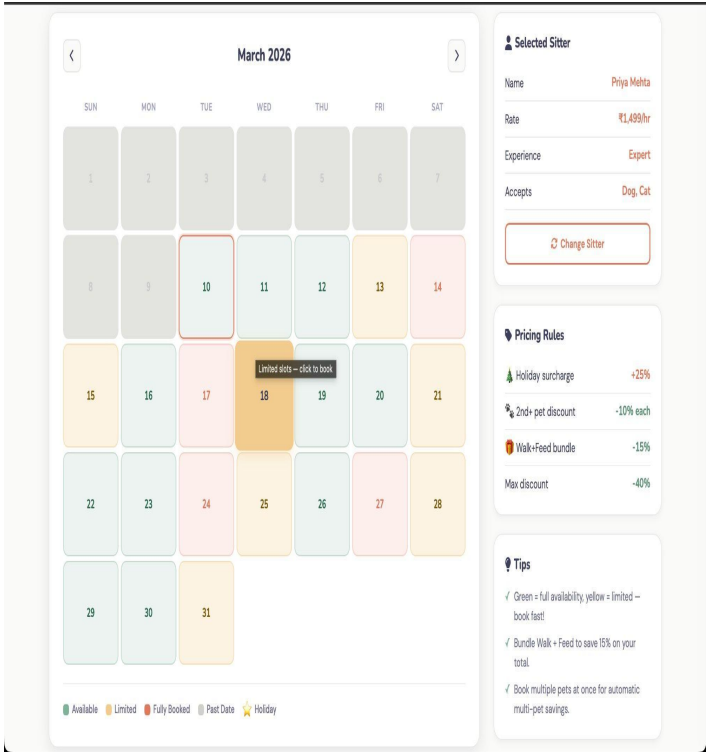
Auto-calculates total cost with holiday surcharges, multi-pet discounts, and bundle savings.

One-Click Booking

Select date, service, pets & duration — confirm in seconds with a full price breakdown.

My Bookings Dashboard

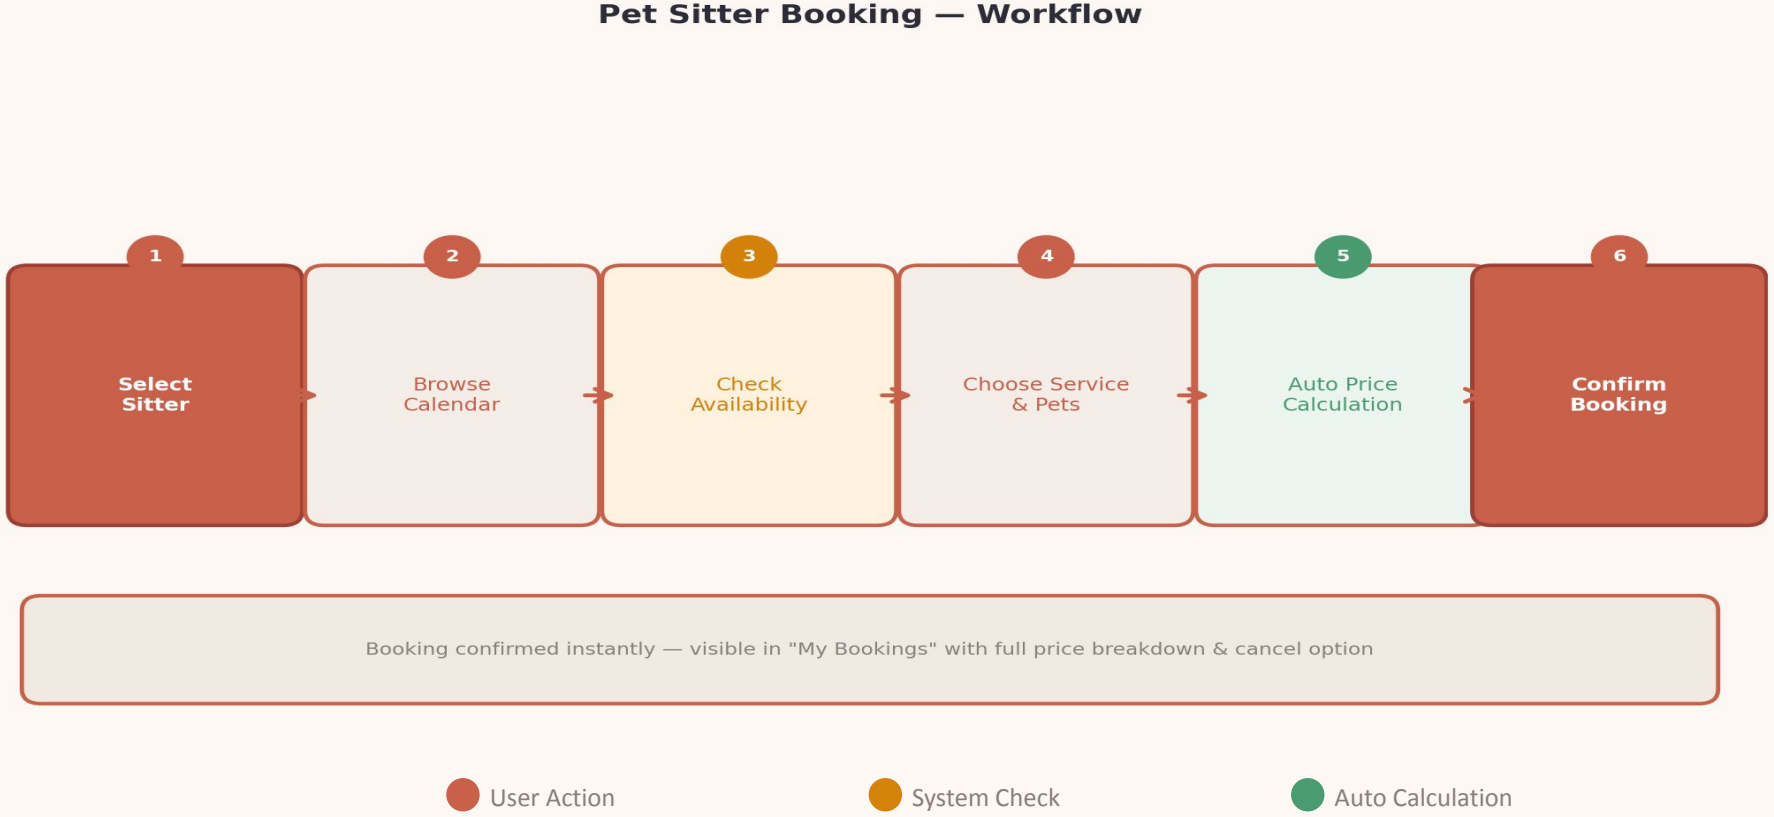
Centralized view of all confirmed bookings with easy cancellation support.



Live Calendar View

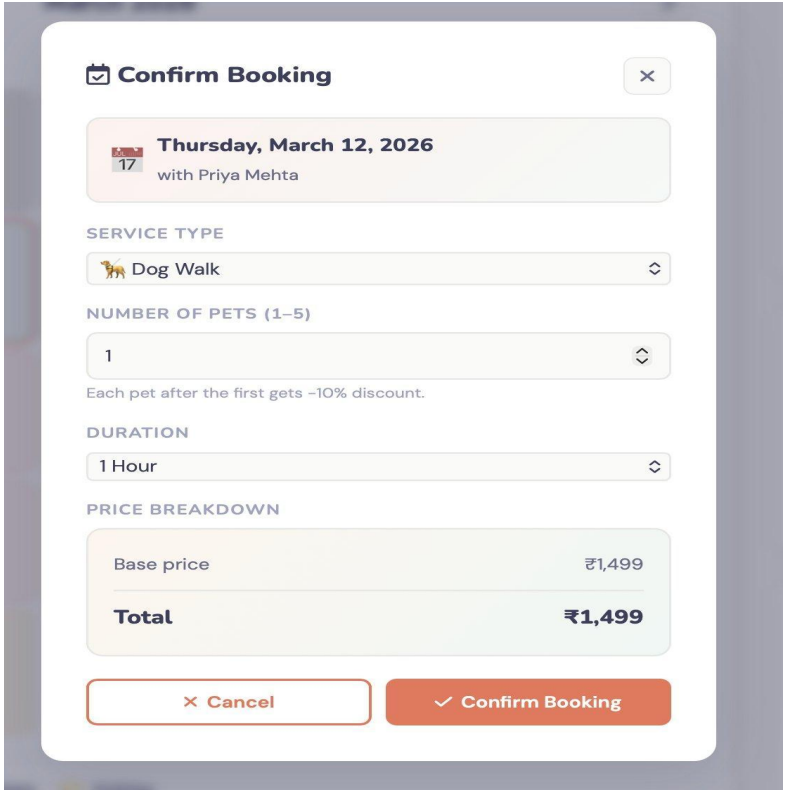
3. Working Method — Workflow

How the booking process flows from selection to confirmation

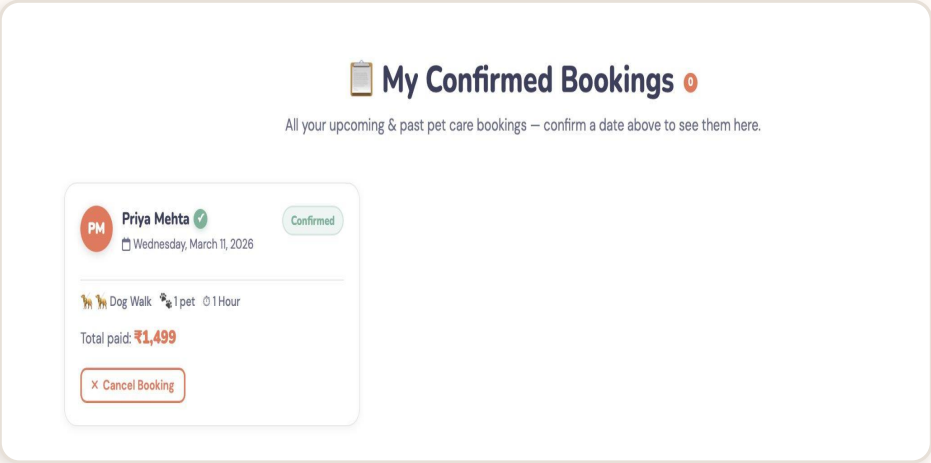


3. Working Method — App Screenshots

Booking modal & confirmed bookings view



Confirm Booking Modal



My Confirmed Bookings

Service + Duration selector

Live price breakdown

Multi-pet discount applied

4. Conclusion

Problem Solved

Eliminates guesswork in finding and booking pet sitters with real-time info.

Transparent Pricing

Smart engine applies all rules — discounts, bundles, surcharges — automatically.

Seamless UX

Color-coded calendar, instant booking modal, and full booking history in one place.

Scalable Foundation

Easily extended with payments, reviews, GPS tracking, and multi-city support.
